✨ What Can AionUi Do?

Multi-Agent Mode - Cowork for Your Command-Line AI Tools, Unified Graphical Interface

AionUi comes with built-in Gemini CLI, ready to use out of the box with no additional installation required; if you have already installed command-line tools like Gemini CLI, Claude Code, CodeX, Qwen Code, Goose AI, Augment Code, AionUi will automatically detect them and provide a unified graphical interface for a richer experience

- **Auto Detection + Unified Interface** - Automatically recognizes local CLI tools, provides a unified graphical interface, say goodbye to command line
- **Local Storage + Multi-Session** - Conversations saved locally, supports multiple parallel sessions, each session with independent context

Multi-Agent Mode Demo

Access Your AionUi Anywhere

Your 7×24 hour AI assistant - Access AionUi from any device, anywhere! On business trips, at home, in the office, use your AI tools anytime, anywhere through WebUI or Telegram

AionUi provides two remote access methods:

-  **WebUI Mode**

Access AionUi from any device via browser - phone, tablet, computer. Supports LAN, cross-network, and server deployment. You can log in by scanning a QR code or using account password, making it simple and convenient.

|  **Need detailed configuration guide?** Check out [Remote Internet Access Tutorial](#)

-  **Telegram Channel**

Chat with your AI assistant directly from Telegram on any device. Simple pairing code system for secure access.

|  **How to set up:** Go to AionUi Settings → WebUI Settings → Channel, get your Bot Token from [@BotFather](#), and start chatting!

⌚ Scheduled Tasks - Let AionUi Automate Your Work

After setting up scheduled tasks, the AI assistant will automatically execute according to your set time, truly achieving 7×24 hours unattended operation

- **Free Conversation** - Tell AI what to do using natural language, just like chatting normally
- **Flexible Time Setting** - Daily, weekly, monthly are all possible
- **Simple and Easy** - Create, modify, enable/disable, delete, view and adjust anytime

Scheduled Tasks Demo

💡 **Use Cases:** Scheduled data aggregation, regular report generation, automatic file organization, scheduled reminders, etc.

Smart File Management (AI Cowork)

Batch renaming, automatic organization, smart classification, file merging

- **Auto Organize:** Intelligently identify content and auto-classify, keeping folders tidy.
- **Efficient Batch:** One-click rename, merge files, say goodbye to tedious manual tasks.

Preview Panel - Quickly View AI-Generated Results

Supports 9+ formats of visual preview (PDF, Word, Excel, PPT, code, Markdown, images, HTML, Diff, etc.)

-  **View Results Instantly** - After AI generates files, view preview immediately without switching apps
-  **Real-time Tracking + Editable** - Automatically tracks file changes, editor and preview sync intelligently; supports real-time editing of Markdown, code, HTML, WYSIWYG

Preview Panel Demo

AI Image Generation & Editing

Intelligent image generation, editing, and recognition, powered by Gemini

 Need help setting up free image generation? [Follow the tutorial to configure image generation models](#)

Multi-Model Support

Supports mainstream models like Gemini, OpenAI, Claude, Qwen, as well as local models like Ollama, LM Studio. Flexibly switch between different models to meet various task requirements.

Multi-Model Support

Personalized Interface Customization

Customize with your own CSS code, make your interface match your preferences

CSS Custom Interface Demo

- **Fully Customizable** - Freely customize interface colors, styles, layout through CSS code, create your exclusive experience

Multi-Task Parallel Processing

Open multiple conversations, tasks don't get mixed up, independent memory, double efficiency

Why Choose AionUi?

Just like Claude Cowork makes Claude Code easier to use, AionUi is the Cowork platform for all your command-line AI tools

While command-line tools like Gemini CLI, Claude Code, Codex, Qwen Code are powerful, they share common pain points: conversations can't be saved, single-session limitations, cumbersome file operations, and only support a single model.

AionUi provides unified **Cowork capabilities** for these command-line tools:

-  **Unified Platform** - One interface to manage all command-line AI tools, no switching needed; built-in Gemini CLI, ready to use out of the box and completely free
-  **Multi-Tool Support** - Not only supports Claude Code, but also Gemini CLI, Codex, Qwen Code, and more
-  **Cross-Platform** - Full platform support for macOS, Windows, Linux (Claude Cowork currently only macOS)
-  **Remote Access** - Your remote 24/7 assistant, access anytime, anywhere, and completely free
-  **Multi-Model Switching** - Flexibly switch between different models in the same interface, meeting different task requirements
-  **Real-time Preview** - Visual preview for 9+ formats, immediately view the effects of AI-generated files
-  **Local Data Security** - All conversations and files saved locally, data never leaves your device

Quick Q&A

- **Q: Why is AionUi a great replacement for Claude Cowork?**
- **Q: What can I do with AionUi?**
- **Q: Is AionUi ready to use out of the box?**
- **Q: Is it free?**
- **Q: Which AI models are supported?**
- **Q: Is my data secure?**

Core Features

Multi-Session Chat

- **Multi-Session + Independent Context** - Open multiple chats simultaneously, each session has independent context memory, no confusion
- **Local Storage** - All conversations are saved locally and will not be lost

Multi-Model Support

- **Multi-Platform Support** - Supports mainstream models like Gemini, OpenAI, Claude, Qwen, flexible switching
- **Local Model Support** - Supports local model deployment like Ollama, LM Studio, select Custom platform and set local API address (e.g., `http://localhost:11434/v1`) to connect
- **Gemini 3 Subscription Optimization** - Automatically identifies subscribed users, recommends advanced models

File Management

- **File Tree Browsing + Drag & Drop Upload** - Browse files like folders, support drag and drop files or folders for one-click import
- **Smart Organization** - You can let AI help organize folders, automatic classification

Preview Panel - Give AI Agent a Display

- **9+ Format Preview** - Supports PDF, Word, Excel, PPT, code, Markdown, images, etc., view results immediately after AI generation
- **Real-time Tracking + Editable** - Automatically tracks file changes, supports real-time editing and debugging of Markdown, code, HTML

AI Image Generation & Editing

- **Intelligent Image Generation** - Supports multiple image generation models like Gemini 2.5 Flash Image Preview, Nano, Banana
- **Image Recognition & Editing** - AI-driven image analysis and editing features

WebUI Remote Access

- **Cross-Device Access** - Access from any device on the network via browser, supports mobile devices
 - **Local Data Security** - All data stored locally in SQLite database, suitable for server deployment
-

Detailed Usage Guide

-  [Expand to View Complete Usage Guide](#)
-

Quick Start

System Requirements

- **macOS**: 10.15 or higher
- **Windows**: Windows 10 or higher
- **Linux**: Ubuntu 18.04+ / Debian 10+ / Fedora 32+
- **Memory**: Recommended 4GB or more
- **Storage**: At least 500MB available space

Download

DOWNLOAD

LATEST RELEASE

Install via Homebrew (macOS)

```
brew install aionui
```

Simple Installation

1. **Download and install** AionUi application
2. **Configure AI service** - Support Google account login or API Key authentication
3. **Start using** - Immediately experience modern AI chat interface

Need detailed configuration guide? Check out our [Complete Installation Tutorial](#)
